# INTRODUCTION

**Quality Experts for Inspection (QEI)** is a third-party inspection (TPI) we are an independent company, not involved in either the manufacturing or the selling, we ensure that the supply chain runs smoothly by conducting
a product inspection for quality control.

Our Inspection and technical testing services are tailored to serve different industries such as construction, industrial, oil and gas, and building sectors. We also provide a wide range of industrial and occupational health and safety training.

Our team at QEI understands the unique needs that companies in different sectors have within their worksites, and our services are tailored to match those needs.

We will help you preserve lives, prevent injury and adhere to regulations. Our services will also guarantee smoother operations and higher productivity.

# VALUES

1

**SAFETY**
Will work with you, not against you, to create a safer business environment

2

**INTEGRITY**
We always do the right thing. With precision, pace and passion

3

**COMMITMENT**
We are committed to delivering the best value services to our clients

4

**MASTERY**
We help businesses work efficiently, deliver with quality and trade with integrity and trust.

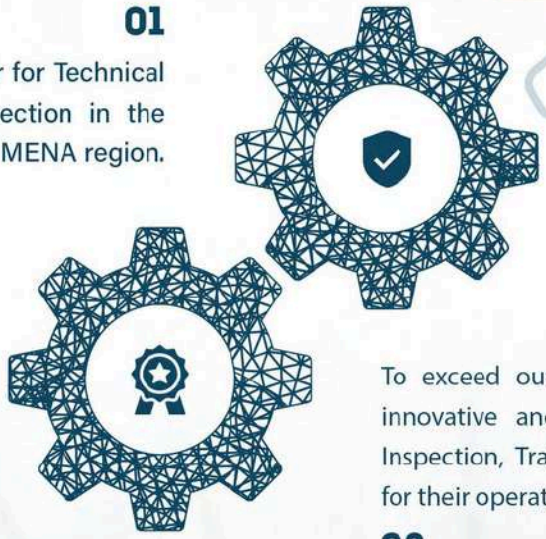
5

**EXPERTISE**
Our staff are all highly experienced and trained professionals

# VISION

01

To be the most trusted partner for Technical Testing and Third-Party Inspection in the MENA region.



To exceed our customers' expectations with innovative and bespoke Assurance, Testing, Inspection, Training and Certification services for their operations.

02

# MISSION

We strive to prevent the customers from disasters of any unsafe nature and to spread awareness on how to keep the working environment in a safe manner, also to serve all the customers in an error free and timely manner and provide outstanding client services at every contact point.

# OUR PROCESS

01

## Inspection Request

We receive a request for equipment inspection from a client, either through a phone call, email, or an online platform. After that we will Gather the relevant information such as the type of equipment, location, and inspection requirements.

02

## Inspection Planning

We analyze the client's requirements and develop a comprehensive inspection plan. Then, determine the scope of the inspection, specific areas to be assessed, applicable standards or regulations, and the necessary inspection methods or tools.

03

## Inspection Execution

We conduct the physical inspection of the equipment as per the agreed plan. Our inspectors will carefully examine the equipment, assess its condition, identify any defects, and evaluate its overall performance and compliance with safety standards.

04

## Inspection Reporting

Preparing a detailed inspection report documenting the findings, including observations, measurements, photographs, and any identified issues or deficiencies. The report will be clear, concise, and provide recommendations for corrective actions, if necessary.

05

## Report Review and Communication

Reviewing the inspection report internally for quality assurance purposes. Ensuring that the report is accurate, complete, and meets the client's requirements. Then, communicating the inspection findings and recommendations to the client, either through a formal report delivery or a meeting to discuss the results.

06

## Follow-up and Support

We provide post-inspection support to the client, including addressing any queries or concerns they may have regarding the inspection findings or recommendations.

# WHY US

01

## Independent 3rd party

We offer professional and impartial consultations endued with true professionalism and integrity.

02

## Integrated services

Your one stop safety solution provider

03

## Quality Service

Highly experienced engineers, inspectors and trainers.

04

## High Value-for-Money

Competitive pricing structures with value-added services

05

## World class Methodology

Our Inspection services follow the standards of SASO/ISO/ IED 17020:(2012), and our Training services follow ISO 17024.

# GOALS

01

## Expand Service Offerings

adding specialized inspection services for specific industries or equipment types, such as electrical inspections, non-destructive testing, or thermal imaging.

02

## Enhance Reporting Accuracy

Implementing rigorous quality control measures to ensure that reports are error-free, well-structured, and contain all the necessary information.

03

## Improve Inspection Efficiency

Streamlining internal processes, optimizing scheduling and logistics, and leveraging technology to automate manual tasks.

04

## Strengthen Customer Relationships

enhancing communication channels, seeking feedback from clients, and proactively addressing any concerns or issues.

# OUR SERVICES

## Equipment Inspection & Training Programs

1. Earth Moving Equipment
2. Lifting Equipment, Accessories and Appliances
3. Mobile Elevating Working Platform (MEWP)
4. Basket
5. Portable Appliance Testing (PAT)
6. Man Riding equipment
7. Suspended Access Equipment
8. Training Programs

# OUR SERVICES

## 01 Earth Moving Equipment

Earth-moving equipment inspections are essential for ensuring safety, optimizing operational efficiency, complying with regulations, minimizing costs, and promoting environmental stewardship.

1. Backhoe loader
2. Bulldozer
3. Dump truck
4. Excavator
5. Motor Grader
6. Skid Steer Loader
7. Track Loader
8. Tractor
9. Trencher
10. Wheel Loader

# OUR SERVICES

## 02 Lifting Equipment, Accessories and Appliances

**Lifting Equipment** inspection is indispensable for maintaining safety, compliance, and operational efficiency in various industries. By conducting regular inspections, businesses can identify and address potential hazards, minimize risks, and uphold regulatory standards.

**Lifting Appliance** is any machine which is able to raise, lower or suspend a load but excluding machines incorporating a guided load (i.e. lifts) and continuous mechanical handling devices (i.e. conveyors). Also commonly referred to as lifting devices. Examples of lifting appliances are cranes, hoists, jacks, etc.

**Lifting Accessory** (rigging equipment / lifting gear / lifting tackle)The term lifting accessory, or accessory for lifting, is used in current legislation to mean an item of equipment used to attach the load to the lifting appliance. Such equipment is also known as 'rigging equipment', 'lifting gear' or 'lifting tackle'. For the purpose of this code the term Lifting Accessory is used throughout.

# OUR SERVICES

## 02 Lifting Equipment, Accessories and Appliances

1. Hoists
2. Hooks
3. Lifting beams
4. Webbing sling
5. Lifting Loops
6. Lifting Clamp
7. Eyebolt
8. Tongs
9. Chain sling
10. Shackle
11. Wire rope sling

# OUR SERVICES

## 02 Lifting Equipment, Accessories and Appliances

1. Tower crane
2. Mobile crane
3. Overhead cranes
4. Vehicle lift
5. Forklifts
6. Sheet lifter

# OUR SERVICES

## 03 MOBILE ELEVATING WORKING PLATFORM (MEWP)

Inspecting Mobile Elevating Work Platforms (MEWPs) is crucial for ensuring the safety of operators and bystanders, as well as compliance with regulations and manufacturer guidelines.

- **Scissor lift**
- **Boom lift**
- **Man lift**
- **Telescopic boom lift**
- **Aerial platform**
- **Vehicle Mounted BMU**
- **Spider lift**

# OUR SERVICES

## 04 Basket

Basket equipment, also known as aerial baskets or man baskets, are used in various industries for tasks that require working at height, such as maintenance, inspection, and construction. These baskets are typically attached to cranes, hoists, or aerial work platforms to provide a safe and stable working platform for personnel.

- **Man Basket**
- **Material Basket**
- **Bricks Basket**
- **Waste Basket**

# OUR SERVICES

## 05 Portable Appliance Testing (PAT)

Portable Appliance Testing (PAT) inspection is a vital process used to ensure the safety of electrical appliances used in various environments, including offices, factories, schools, and construction sites. PAT involves a series of visual and electrical tests to assess the safety and integrity of portable appliances and equipment.

- **Welding Machines**
- **Hand Power Tools**
- **Grinding**
- **Cutting Machines**

# OUR SERVICES

## 06 Man Riding Equipment

Man-riding equipment, also known as personnel lifting equipment, is used to safely transport workers to elevated work areas in various industries such as construction, maintenance, and rescue operations. Ensuring the safety of workers is paramount for any company.

Regular inspections of man-riding equipment help companies comply with safety regulations and standards set forth by government agencies and industry organizations. Failure to comply with these regulations can result in fines, penalties, and legal liabilities.

# OUR SERVICES

## 07 SUSPENDED ACCESS EQUIPMENT

Inspecting suspended access equipment, such as suspended scaffolding or swing stages, is crucial for ensuring the safety of workers who perform tasks at heights, such as maintenance, construction, or window cleaning on buildings and structures.

- **Suspended Scaffolding**
- **Swing Stages**
- **Travelling Ladders**
- **Window Cradle**
- **Platform**
- **Rope Access**
- **Hoists**
- **BMU**

# OUR SERVICES

## 08 Training Programs

The following is a list of training courses QEI provides:

### Operator Certification

**01. Rigger III**

**02. Rigger II**

**03. Rigger I**

**04. Lifting Supervisor**

**05. Scaffolder**

**06. Scaffolds Supervisor**

**07. Scaffolds Inspector**

**08. First Aid Training**

**09. Fire Warden Training**

**10. Fire Marshal Training**

**11. Banksman Training**

# OUR SERVICES

## 08 Training Programs

The following is a list of training courses QEI provides:

### Operator Certification

**12. Emergency Evacuation Training**
**13. Operator Training & Assessment**
**14. Hazard Identification And Risk Assessment**
**15. Confined Space**
**16. Safe Use Of Power Tools**
**17. Work at Height**
**18. Permit to Work**
**19. Flag Man**
**20. Health & Safety Management Training**
